FOR IMMEDIATE RELEASE:

NEW TOTALS: 144 CASES OF COVID-19 IDENTIFIED IN DELAWARE COUNTY; 11 TOTAL DEATHS

DELAWARE COUNTY, IN- The Delaware County Health Department (DCHD) reports Thursday of additional individuals within Delaware County having tested positive through lab testing for SARS-CoV-2 (the virus that causes COVID-19 infection); bringing the latest total to 144 confirmed cases and now 11 attributed deaths. Today's report of 144 total includes 10 new individual confirmations, as well as a single case deduction from previously reported totals following the case investigation.

The DCHD continues working closely with the local and state officials to ensure that contacts of the patient are identified and that all infection control protocols are being followed.

The 10 most recently confirmed cases being reported since Wednesday's Press Release include: 1 female over the age of 20, 2 females over the age of 30, 1 male over 30, 1 female over 40, 1 male over 50, 1 male over 60, 2 females over 70, and 1 female over 90. The single case deduction from the previous rolling total was a female case originally reported with an unknown age on April 11th. No additional information about the patients will be released at this time due to privacy laws.

Human coronaviruses most commonly spread from an infected person to others through:

- Respiratory droplets released into the air by coughing and sneezing;
- Close personal contact, such as touching or shaking hands;
- Touching an object or surface with the virus on it, then touching your mouth, nose, or eyes before washing your hands; and
- Rarely, fecal contamination.

The best way to protect yourself from any respiratory illness, including the flu, is to:

- Wash your hands often w/ soap & water for at least 20 seconds. If soap & water are not available, use alcohol-based hand sanitizer.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Avoid close contact (within 6 feet) with people who are sick.
- Stay home when you are sick.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Clean and disinfect frequently touched objects and surfaces.

The Indiana State Department of Health (ISDH) provides statewide updates as new information becomes available. Visit the ISDH website at in.gov/coronavirus for the most up-to-date information on COVID-19 in Indiana.

For updated local information: The Delaware County Emergency Management Agency, in collaboration with the Delaware County GIS Department, have created and are maintaining a central location for local updates. Please visit the Delaware County, Indiana Coronavirus Hub at www.dcema.com.
