To perform this position successfully, an individual must be able to perform each essential function of the position satisfactorily. The requirements listed in this document are representative of the knowledge, skill, and/or ability required. Delaware County provides reasonable accommodations to qualified employees and applicants with known disabilities who require accommodation to complete the application process or perform essential functions of the job unless the accommodation would present an undue hardship.

DUTIES:

Administers and performs civil engineering for various highway, traffic-bridge and site civil projects, such as assisting with initial planning/designing, right-of-way acquisitions and drainage studies, recommending professional consultants, coordinating work with Superintendent, and administering project budgets.

Attends and participates in Board of County Commissioners meetings, preparing/making recommendations on a variety of issues, such as new road standards and specifications, new ordinances involving County highway system, legal agreements and contract awards, litigation settlements, and new traffic controls.

Responds to inquiries and provides technical assistance to developers, contractors, materials suppliers, consultants, government officials, and the public regarding department projects/operations. Meets with news media as department and/or Commissioners' representative regarding engineering issues, such as policies, programs, projects, budget, and accidents.

Oversees all road, bridge, subdivision, plats, guardrail, and pavement marking projects, including reviewing, approving or denying plans, monitoring inspections, and monitoring approval of related claims/vouchers. Negotiates agreements with road and bridge professional services consultants, and oversees performance.

Attends various committee and intergovernmental meetings to coordinate, discuss, and report on

Engineering/County Engineer

common issues, such as GIS applications, and highway safety, standards, and maintenance. Reviews right-of-way appraisals and authorizes offers to purchase property for right-of-way; evaluates and approves administrative settlements of counter offers within guidelines set by County Commissioners.

Reviews and approves traffic studies to identify problem areas. Supervises maintenance of county road/bridge/sign/pavement marking/culvert inventory and evaluation programs.

Coordinates with Superintendent in planning and assigning Department personnel and material resources in maintaining County roads, bridges, culverts, and related areas. Maintains inventory of county roads.

Assists in supervising and directing personnel, including reviewing applications, making hiring recommendations, planning and making work assignments, and providing training.

Serves as County Employee of Responsible Charge (ERC) ensuring compliance of all state and federal aid regulations related to project development and local construction projects.

Develops and implements traffic engineering studies and prepares related ordinances as needed, such as driving speeds, traffic volume, and regulatory/warning signs including directing and supervising technical personnel as needed.

Reviews various plans/specifications for compliance with County ordinances, rules, and regulations, such as subdivisions, large developments, residential and commercial drives, and utility permit applications. Receives and investigates valid complaints from the public regarding road repairs, drainage problems, bridge conditions, and other road-related problems, and makes recommendations for solution.

Assists with coordination of planning efforts with other government agencies, including providing subdivision technical assistance/information to developers, builders, utility companies, and property owners regarding entrance and exit right-of-way road construction and repair standards.

Prepares cumulative bridge fund budget and other budgets as required, submitting and presenting to County Commissioners for approval.

Prepares Department bid documents and specifications for materials and equipment purchases. Prepares and submits reports of Department projects/activities to federal, state and local agencies as required.

Develops and publishes road, bridge, and miscellaneous standards.

Develop and maintain County Engineering standards.

Periodically designs, performs engineering, and/or oversees construction of various County projects, such as installation of septic systems and parking lots.

Engineering/County Engineer

Periodically attends various meetings as needed or requested to review engineering recommendations on projects, such as County Council, Board of County Commissioners, Board of Zoning Appeals and Plan Commission.

Supervises and monitors the design, planning and prioritization of all road, bridge and culvert work.

Supervises and inspects all construction and maintenance projects to ensure quality and timely performance.

Meets with the public to respond to questions and resolve problems concerning the County's highway system; performs public relations work within the community and state.

Attends professional education workshops and training seminars as needed.

Serves on 24-hour call for emergencies.
